

CANOPY (DO-IT-YOURSELF) TENT

SET UP

1. Spread the OTC tent flat, and then pull the corners square.
2. Pull the ropes out perpendicular from the edge of the tent. See diagram below.

X's are approximate stake locations

3. AFTER you have determined that no underground utilities will be disturbed (see WARNING below), place stakes in the ground at each rope location, approximately 6 feet from the tent edge. Drive each stake through the round metal ring, or simply loop the rope over each stake.
4. Put side poles together, one long pole and one short.
5. Place the four corner poles into position with the bottom slightly inward, toward the center. Tighten ropes until snug.
6. Put up the other side poles and tighten ropes.
7. Assemble the center pole(s), two long poles and one short pole.
8. Position the center pole(s). Tie the center pole rope to center pole.
9. Go back around tent and tighten all ropes.

TAKE DOWN

Please dismantle tent when it is **dry** and return it in the appropriate bags. Remember to locate and return all stakes.

CAUTION

In the event of severe weather forecasts, keep all guests AWAY from the tent, and take it down.

- DO NOT cook or grill under the tent.
- DO NOT use adhesive-backed tapes.
- DO NOT attach anything to vinyl canvas.

WARNING: BEFORE PLACING STAKES INTO THE GROUND, YOU MUST DETERMINE THAT NO UNDERGROUND UTILITIES WILL BE DISTURBED.

Call NEW JERSEY 800 272-1000 or Call PENNSYLVANIA 800 242-1776 to locate underground utilities.
